The Organic Seed Sourcing Service
The Saving Our Seed Project

We will accept lists from organic growers of the organic seeds they wish to plant and reply to them with a list of dealers that sell them. Conversely, if no organic seeds are available, we will then be able to provide documentation of this that would be suitable to all certification agents. We will send you our fully documented reply within 4 business days of receipt of your request. If we can fax the results back to you, we will do that free of charge. If you need us to mail your results to you, please include $1.50 for postage.
